Modular rack cold aisle dimensions

Overview

Height: 300mm; width: 300mm; thickness: 1. 2Mm; for 600mm wide cabinets; 1 pair for a 600mm wide roof panel; with holes for t5 lighting and atmosphere lamp. Containment Top Panel Has Even Roof Structure, 350mm Higher Than Cabinet Top, Top Panel Total Width Is 1305mm, Modular Frame Design, Easy To Installation. The Net Height Of Aisle Container Is Above 2 Meters When The Top Panel Dropped Away, So The Daily Maintenance Will Not Be A ected. The Modular system is physically attached to t e rack, and features sliding doors with Lexan (polycarbonate) windows It has aluminum profile roof panels that span the width of ip design to accommodate non-uniform rack heights and. ArcTiv Aisle Containment Systems provide efficient hot and cold air isolation for data centers and server rooms. The modular design is simple to configure and deploy while providing access control and automatic operation to sync with building fire suppression systems. Tempered glass containment. Freestanding, Rack-independent system with the flexibility to maximize efficiency and capacity from the core to the edge for raised floor and slab data centers.

AISLE CONTAINMENT

Aisle containment in the data center requires that cabinets are aligned in a hot aisle/cold aisle layout. Containment panels or strips create a partition to isolate either the server supply air (cold aisle
