Network cable module panel patch panel

Overview

They are commonly used to organize in-wall Ethernet cable runs, with cables running from Ethernet wall jacks to patch panels housed in central server rooms. The panel itself is made from blank ports on one side, and a termination point or keystone jack on the other side. Patch panels are a great way to improve your network management by making it simple to organize your cables and connections. Thankfully, our trueCABLE team has the perfect solution to achieve superior cable efficiency and organization—our signature line of patch. With a patch panel you bring structure to your cabling and make maintenance and expansion easier. Here you can read everything you need to know to choose the right patch panel and connect it correctly. Cut off the cross-shaped skeleton of the Cat6 patch cord.
